

# Patoka School

## Cultural / Experiences continuum

The use of the expanding triangle as a shape to show the concepts being covered symbolizes the fact that each concept is covered in more depth at each class level. We have considered carefully what we want our children to experience in their 8 Years at Patoka and feel that a large majority of these concepts have importance from 5 years old to 13 Years old. They are necessary for our students to meet the Graduate profile of learning in Maori that we have developed.
